The figure displays protein structure and disorder analysis for two protein segments. The top segment (1-60) shows a full-length protein with a secondary structure prediction (SS) of 100% confidence, indicated by a green bar. The disorder analysis shows a protein that is mostly disordered (red) with some structured regions (green). The bottom segment (1-20) shows a protein fragment with a secondary structure prediction (SS) of 100% confidence, indicated by a green bar. The disorder analysis shows a protein that is mostly disordered (red) with some structured regions (green).

Sequence	MDL D Y C I I C G K P T T G N L Y C S R E C H L Q D C P G C G S T S E Q C S Y S K S A D L H M L S S Q Y L D H F R R R
Secondary structure	Blue arrows indicating alpha-helices and beta-strands.
SS confidence	Green bar indicating 100% confidence.
Disorder	Red bar indicating high disorder, with some green segments indicating structured regions.
Disorder confidence	Red bar indicating high confidence in disorder, with some green segments indicating structured regions.

Sequence	S S M P S P S T S S S L L N G F V A S R L A V L
Secondary structure	Blue arrows indicating alpha-helices and beta-strands.
SS confidence	Green bar indicating 100% confidence.
Disorder	Red bar indicating high disorder, with some green segments indicating structured regions.
Disorder confidence	Red bar indicating high confidence in disorder, with some green segments indicating structured regions.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
