The figure displays the protein structure and analysis for the full-length protein and a specific fragment. The top section shows the full-length protein (residues 1-60) with its sequence, secondary structure, and various confidence scores. The bottom section shows a detailed view of a protein fragment (residues 1-4) with its sequence, secondary structure, and confidence scores.

Full-length protein (residues 1-60):

- Sequence:** MYVCLCNGISDKKIRQAVRQFSPHSFQQLK KFI PVGNQCGKCVRAAREVMEDELMQLPEF
- Secondary structure:** The structure shows a blue arrow indicating a beta-strand at the N-terminus, followed by several green alpha-helices and loops.
- SS confidence:** A bar chart showing confidence scores for each residue, with colors ranging from red (high confidence) to yellow (low confidence).
- Disorder:** A bar chart showing disorder scores, with question marks indicating regions of low confidence or disorder.
- Disorder confidence:** A bar chart showing confidence scores for disorder, with colors ranging from blue (high confidence) to red (low confidence).

Protein fragment (residues 1-4):

- Sequence:** KESA
- Secondary structure:** The structure shows a green alpha-helix.
- SS confidence:** A bar chart showing confidence scores for each residue, with colors ranging from red (high confidence) to yellow (low confidence).
- Disorder:** A bar chart showing disorder scores, with question marks indicating regions of low confidence or disorder.
- Disorder confidence:** A bar chart showing confidence scores for disorder, with colors ranging from blue (high confidence) to red (low confidence).
