Protein structure and disorder analysis for the first three domains of the protein. The figure shows sequence, secondary structure, SS confidence, disorder, and disorder confidence for residues 1-60, 70-120, and 130-139. The first two domains (1-60 and 70-120) are shown in detail with helices and loops, while the third domain (130-139) is shown as a short segment. The disorder analysis indicates that the first two domains are highly disordered, while the third domain is mostly structured.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
