Protein structure and disorder analysis for two protein segments. The top segment (residues 1-60) shows a continuous alpha-helical structure with high sequence confidence and low disorder. The bottom segment (residues 70-100) shows a helix from residue 75 to 95, with a blue arrow indicating a transition or insertion point at residue 78. This segment has lower sequence confidence and higher disorder compared to the top segment.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
