The figure displays two panels of protein structure and disorder analysis. The top panel covers residues 1 to 60, and the bottom panel covers residues 70 to 110. Each panel includes the following information:

- Sequence:** The amino acid sequence is shown in a color-coded font.
- Secondary structure (SS):** Represented by green alpha-helices. In the bottom panel, a blue arrow points to a region between residues 90 and 100.
- confidence:** A bar representing the confidence score for the secondary structure prediction, with colors corresponding to the sequence.
- Disorder:** A bar representing the disorder prediction, with colors corresponding to the sequence.
- Disorder confidence:** A bar representing the confidence score for the disorder prediction, with colors corresponding to the sequence.
