The figure displays protein structure and disorder analysis for the full protein and two fragments. The full protein (1-120) is shown in two panels, and two fragments (1-70 and 80-120) are shown in separate panels. Each panel includes the sequence, secondary structure (SS), SS confidence, disorder, and disorder confidence.

Full Protein (1-120):

- Sequence:** MKSVFTI SASLAIS LMLCCTAQANDHKLLGAI AMPRNETNDLALKL P VCRIVKRI QLSAD
- Secondary structure:** Blue arrows indicate alpha-helices and green cylinders indicate beta-strands.
- SS confidence:** A bar chart showing confidence levels for each residue.
- Disorder:** A bar chart showing disorder levels, with question marks indicating low confidence.
- Disorder confidence:** A bar chart showing confidence levels for each residue.

Fragment 1 (1-70):

- Sequence:** HGD LQL SGASVYF KAARSAS QSLNIPSEI KEGQT TDWI NI NSDNDNKR CVSKI TFS GHTV
- Secondary structure:** Blue arrows indicate alpha-helices and green cylinders indicate beta-strands.
- SS confidence:** A bar chart showing confidence levels for each residue.
- Disorder:** A bar chart showing disorder levels, with question marks indicating low confidence.
- Disorder confidence:** A bar chart showing confidence levels for each residue.

Fragment 2 (80-120):

- Sequence:** NSSDMATLKIIGDD
- Secondary structure:** Blue arrows indicate alpha-helices and green cylinders indicate beta-strands.
- SS confidence:** A bar chart showing confidence levels for each residue.
- Disorder:** A bar chart showing disorder levels, with question marks indicating low confidence.
- Disorder confidence:** A bar chart showing confidence levels for each residue.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix
