Figure 1 displays the protein structure and disorder analysis for the protein. The figure is organized into three panels, each showing a different segment of the protein structure (residues 1-60, 70-120, and 130-160). The panels are labeled 'Sequence', 'Secondary structure', 'SS confidence', 'Disorder', and 'Disorder confidence'.

The 'Sequence' panel shows the amino acid sequence of the protein. The 'Secondary structure' panel shows the predicted secondary structure elements (alpha-helices and beta-strands) as blue arrows. The 'SS confidence' panel shows the confidence scores for the secondary structure predictions, with colors indicating different levels of confidence (red for high, yellow for medium, green for low). The 'Disorder' panel shows the predicted disorder regions as green bars. The 'Disorder confidence' panel shows the confidence scores for the disorder predictions, with colors indicating different levels of confidence (red for high, yellow for medium, green for low).

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
