Protein structure and disorder analysis for three protein segments. Each segment shows the amino acid sequence, secondary structure (alpha helices and beta strands), solvent accessibility (SS), and disorder confidence. Segment 1 (residues 1-60) shows a protein with several alpha helices and a disordered C-terminus. Segment 2 (residues 70-120) shows a protein with a beta strand followed by a long alpha helix. Segment 3 (residues 130-150) shows a protein with two alpha helices. Disorder confidence is indicated by a color scale from red (high) to green (low).

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
