Protein structure visualization of the N-terminal region of the protein. The image shows three segments of the protein sequence, each with its corresponding secondary structure (SS) and disorder confidence. The first segment (residues 1-60) shows a long alpha-helix (green) followed by a long beta-strand (blue). The second segment (residues 70-120) shows a long alpha-helix (green) followed by a long beta-strand (blue). The third segment (residues 130-140) shows a short alpha-helix (green). The disorder confidence is indicated by a color scale from red (high) to blue (low).

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
