Figure 1 displays the protein structure and disorder analysis of the N-terminal region of the protein. The figure shows two segments of the protein sequence. The top segment (residues 1-60) shows a beta-strand (blue arrow) followed by a large alpha-helical region (green helices). The bottom segment (residues 70-110) shows an alpha-helical region (green helices) followed by a beta-strand (blue arrow). Below the sequences are tracks for Secondary Structure (SS), confidence, Disorder, and Disorder confidence. The disorder track shows regions of predicted disorder (red) and confidence (green/yellow).
