Figure 1 displays the protein structure and disorder analysis of the human protein. The figure shows the full-length protein sequence (600 residues) and its predicted secondary structure (SS) and disorder. The sequence is color-coded, and the secondary structure is represented by green cylinders (alpha-helices) and blue arrows (beta-strands). The disorder analysis shows regions of predicted disorder (red) and confidence (green/yellow). The protein is divided into four segments: 1-60, 61-120, 121-180, and 181-240. The first segment (1-60) shows a high degree of disorder. The second segment (61-120) shows a high degree of disorder. The third segment (121-180) shows a high degree of disorder. The fourth segment (181-240) shows a high degree of disorder.
