Protein structure and disorder analysis of the first 120 amino acids of the protein. The analysis is divided into three segments: 1-60, 70-120, and 130-150. Each segment shows the sequence, secondary structure (alpha-helices, beta-strands, loops), solvent accessibility (SS), confidence, and disorder. The first segment (1-60) shows a high degree of disorder. The second segment (70-120) shows a more structured region with several alpha-helices and beta-strands. The third segment (130-150) shows a highly structured region with a large alpha-helix and a beta-strand.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
