Protein structure analysis of the N-terminal region of the protein. The image shows two segments of the protein sequence. The first segment (residues 1-60) is highly disordered, with no stable secondary structure elements. The second segment (residues 70-120) contains a stable alpha-helix (residues 100-110) and a beta-strand (residues 115-120). The third segment (residues 1-3) is also highly disordered.

Confidence Key

High(9)  Low (0)

? Disordered

 Alpha helix

 Beta strand
